Resolved main bug when new member register with invited email

=> Admin:

DB crashed bug resolved

=>Validation for members and for admin to show on:

*Home Screen

*Workspaces

*Nav Side BAR

*bOARDS

*lISTS

*cARDS

=> Validation for dragging and dropping cards and list:

   Only admin can drag and drop...

=> Api's making + integration for achieve comment to get, restore & delete

=> Validation for writing comments on card:

   Only admin can, delete, and edit other team-members comments

  Team member can only edit his own comment rather than to change or delete etc.

⇨ Flowchart idea for documentation

=> Theoretical documentation using USE_CASE_DIAGRAMS

CURRENT

⇨ Changing picture for landing page & for sign up / login.

⇨ Implement search functionality for each screen to filter board or workspace.

⇨ Implemented user update role functionality to change member's role (this is only for admin).

⇨ 80% implementation done on user activity to show which member add or remove.
