Objective

I am a highly skilled and results-oriented software developer with expertise in PHP Laravel and .NET Core Angular technologies. With a proven track record of delivering high-quality web applications, I bring a strong foundation in both back-end and front-end development. My experience includes collaborating with cross-functional teams to gather requirements, design scalable solutions, and implement robust code. Proficient in database management, RESTful API development, and version control using Git, I am dedicated to producing efficient and maintainable code. I thrive in dynamic and challenging environments, and my problem-solving skills, combined with a commitment to best development practices, make me a valuable asset to any project. Whether working independently or as part of a team, I am passionate about creating innovative and user-friendly software solutions that meet and exceed client expectations.

Experience

- Eziline Softwre:

Dynamic web development intern at Eziline Software Solutions, leveraging a 3-month internship to acquire hands-on experience in building responsive and user-friendly web applications. Applied programming skills in a collaborative team environment to enhance technical proficiency and kickstart a rewarding career in web development

1-6-2020 - 5-3-2021

- Willobyte Company
  Php Codeigniter dev

As a PHP Laravel Developer at Willobyte Company, I played a key role in development and implementing robust web applications. Collaborating with a talented team, I contributed to the development of scalable solutions using PHP Laravel, ensuring high-
Performance and seamless user experiences. My responsibilities included database management, API development, and active participation in code reviews to maintain code quality and adherence to industry standards.

- Willobyte Company
  Laravel Developer

10-3-2021 - 29-12-2021

I took on the role of a Web Developer, where I was responsible for creating and maintaining dynamic websites.

Utilizing a diverse skill set, including HTML CSS JAVA and JQUERY, I contributed to the development of interactive and visually appealing web solutions. Working closely with the marketing team, I translated design concepts into functional websites, ensuring a seamless integration of front-end and back-end components. My role also involved troubleshooting and resolving issues promptly to optimize website performance.

- F3 Technologies
  9-1-2022 - 2-12-2023
  Web Developer

In my role at F3 Technology, I served as a proficient php, codeigniter and Laravel developer, contributing significantly to projects for Unilever and other company products such as Multiple Branch Management School Ecommerce and Travel and Tour Project. Working on Unilever projects, I played a pivotal role in the development and implementation of scalable solutions using php frameworks. Additionally, my responsibilities extended to Front-End development also java script and jQuery as well ensuring the creation of dynamic and responsive front-end components.
